

Insurance

Your community composting scheme insurance policy should cover your volunteers as well as third parties.

Parish Council Insurance

Insurance for community composting schemes can be obtained as an extension of a Parish Council's existing insurance policy.

The Conservation Volunteers (TCV)

It is also possible to obtain group insurance from organisations such as The Conservation Volunteers.

TCV offer both Public Liability and Personal Accident cover in their Combined Policy. The extent of cover is dependent upon the amount of manual work carried out each year. The average premium is around £200, which includes membership to the TCV Community Network. Other policies are available to insure tools, items of property and employees.

TCV have put together an Insurance guide to explain the policies on offer to composting groups:
