

A day in the life: juice carton

Please check [norfolkrecycles.com](https://www.norfolkrecycles.com) for a full list of items you can recycle.

Juice cartons are made of both paper and plastic, which need to be separated before they are made into something new.

The cartons are mixed with water and pulped in a machine, similar to a washing machine, to separate the different materials.

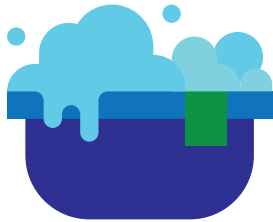

The paper fibres are dried and rolled out, and could be used to make a gravy tub.

The plastic lining can be made into items like park benches.

Please ensure your recycling is:

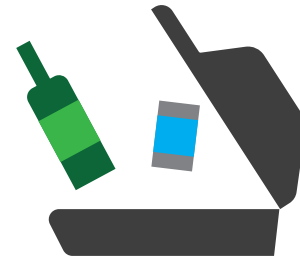

Clean

Leftover food or liquid contaminates recycling

Dry

Wet items can also contaminate other recycling

Loose

Please don't put carrier bags or sacks in your bin
